Entsorgung

Werfen Sie Gartengeräte, Ladegeräte und Akkus/Batterien nicht in den Hausmüll!

Nur für EU-Länder:

Gemäß der europäischen Richtlinie 2012/19/EU müssen nicht mehr gebrauchsfähige Elektro- und Elektronikgeräte und gemäß der europäischen Richtlinie 2006/66/EG müssen defekte oder verbrauchte Akkus/Batterien getrennt gesammelt und einer umweltgerechten Wiederverwendung zugeführt werden.

Nicht mehr gebrauchsfähige Akkus/Batterien können direkt abgegeben werden bei:

Deutschland

Recyclingzentrum Elektrowerkzeuge
Osteroder Landstraße 3
37589 Kalefeld

Schweiz

Batrec AG
3752 Wimmis BE

Akkus/Batterien:

Li-Ion:

Bitte beachten Sie die Hinweise im Abschnitt „Transport“.

Änderungen vorbehalten.

Safety Notes

Warning! Read these instructions carefully, be familiar with the controls and the proper use of the machine. Please keep the instructions safe for later use!

Explanation of symbols

General hazard safety alert.

Read instruction manual.

Pay attention that bystanders are not injured through foreign objects thrown from the machine.

Warning: Keep a safe distance from the machine when operating.

Not applicable.

Remove battery before adjusting or cleaning, and before leaving the machine unattended for any period.

Wear eye and ear protection.

Do not work in the rain or leave the trimmer outdoors whilst it is raining.

Pay attention that bystanders are not injured through foreign objects thrown from the machine.

Warning: Keep a safe distance from the machine when operating.

Only use the battery charger indoors.

Battery charger contains a safety transformer.

Operation

► The advanced cutting system on this product, should feed a controlled length of line every time the motor is activated.

12 | English

- ▶ This machine is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the machine by a person responsible for their safety. Children should be supervised to ensure that they do not play with the machine.
- ▶ Never allow children or people unfamiliar with these instructions to use the trimmer. Local regulations may restrict the age of the operator. When not in use, store the trimmer out of reach of children.
- ▶ Never operate the trimmer with missing or broken guards or shields or without guards or shields in position.
- ▶ After Fitting the guard carefully remove the protective tape from the line blade.
- ▶ Before using the machine and after impact, check for signs of wear or damage and repair if necessary.
- ▶ Never operate the product when you are tired, ill or under the influence of alcohol, drugs or medicine.
- ▶ Always wear long heavy trousers, boots and gloves. Do not wear loose clothing, jewellery, short trousers, sandals and never work barefoot.
- ▶ **Wear safety eye protection and ear defenders when operating the machine.**
- ▶ Keep firm footing and balance. Do not overreach.
- ▶ Never work with this trimmer while people, especially children or pets are nearby.
- ▶ The user is responsible for accidents or hazards occurring to other people or their property.
- ▶ Wait until the cutting head has completely stopped before touching it. The head continues to rotate after the trimmer is switched off, the cutting system can cause injury/damage.
- ▶ Work only in daylight or in good artificial light.
- ▶ Avoid operating the machine in bad weather conditions especially when there is a risk of lightning.
- ▶ Operating the trimmer in wet grass decreases the efficiency of performance.
- ▶ Switch off when transporting the trimmer to and from the area to be worked on.
- ▶ Switch on the trimmer with hands and feet well away from the rotating line.
- ▶ Do not put hands or feet near the cutting system.
- ▶ Do not put hands or fingers near to the line cutting blade.
- ▶ Never fit metal cutting elements to this trimmer.
- ▶ Inspect and maintain the trimmer regularly.
- ▶ Have the trimmer repaired only by an authorized customer service agent.
- ▶ Always operate the machine with the cutting system horizontal to the ground.

- Always ensure that the ventilation slots are kept clear of debris. Clean ventilation with soft brush after use.
- Take care against injury from the blade fitted for cutting the nylon line length. After feeding line always return the trimmer to its horizontal operating position before switching on.
- Switch off and remove the battery:
 - whenever you leave the machine unattended for any period
 - before replacing the cutting line
 - before cleaning or working on the trimmer
 - before removing the trimmer attachment
 - Before replenishing cutting line
 - Before disassembling the trimmer
- Store the machine in a secure, dry place out of the reach of children. Do not place other objects on top of the machine.
- Replace worn or damaged parts for safety.
- Ensure replacement parts fitted are Bosch approved.
- **Do not operate the machine without the trimmer attachment and the guard fitted.**

Recommendations for Optimal Handling of the Battery

- **Ensure the switch is in the off position before inserting battery pack.** Inserting the battery pack into machines that have the switch on can cause accidents.
 - **Use only Bosch battery packs intended specifically for the machine.** Use of any other battery packs may create a risk of injury and fire.
 - **Do not open the battery.** Danger of short-circuiting.
- 

Protect the battery against heat, e. g., against continuous intense sunlight, fire, water, and moisture. Danger of explosion.
- **When battery pack is not in use, keep it away from other metal objects like paper clips, coins, keys, nails, screws, or other small metal objects that can make a connection from one terminal to another.** Shorting the battery terminals together may cause burns or a fire.
 - **In case of damage and improper use of the battery, vapours may be emitted. Ventilate the area and seek medical help in case of complaints.** The vapours can irritate the respiratory system.
 - **Use the battery only in conjunction with your Bosch product.** This measure alone protects the battery against dangerous overload.
 - **The battery can be damaged by pointed objects such as nails or screwdrivers or by force applied externally.** An internal short circuit can occur and the battery can burn, smoke, explode or overheat.
 - **Do not short-circuit the battery.** There is danger of explosion.
 - Protect the battery against moisture and water.

14 | English

- Store the battery only within a temperature range between $-20\text{ }^{\circ}\text{C}$ and $50\text{ }^{\circ}\text{C}$. As an example, do not leave the battery in the car in summer.
- Occasionally clean the venting slots of the battery using a soft, clean and dry brush.

Safety Warnings for Battery Chargers

Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

Save these instructions.

Use the battery charger only when you fully understand and can perform all functions without limitation, or have received appropriate instructions.

- **This charger is not intended for use by children and persons with physical, sensory or mental limitations or a lack of experience or knowledge.** This charger can be used by children aged 8 and above and by persons who have physical, sensory or mental limitations or a lack of experience or knowledge if a person responsible for their safety supervises them or has instructed them in the safe operation of the charger and they understand the associated dangers. Otherwise, there is a danger of operating errors and injuries.
- **Supervise children during use, cleaning and maintenance.** This will ensure that children do not play with the charger.
- **Only charge Bosch lithium-ion batteries with a capacity of 1.3 Ah or more (10 battery cells or more). The battery voltage must match the battery charging voltage of the charger. Do not charge non-rechargeable batteries.** Otherwise there is danger of fire and explosion.
- **Keep the battery charger away from rain or moisture.** Penetration of water in the battery charger increases the risk of an electric shock.
- **Only charge Bosch lithium-ion batteries. The battery voltage must match the battery charging voltage of the charger.** Otherwise there is danger of fire and explosion.
- **Keep the battery charger clean.** Contamination can lead to danger of an electric shock.
- **Before each use, check the battery charger, cable and plug. If damage is detected, do not use the battery charger. Never open the battery charger yourself. Have repairs performed only by a qualified technician and only using original spare parts.** Damaged battery chargers, cables and plugs increase the risk of an electric shock.
- **Do not operate the battery charger on easily inflammable surfaces (e. g., paper, textiles, etc.) or surroundings.** The heating of the battery charger during the charging process can pose a fire hazard.

► **Do not cover the ventilation slots of the battery charger.** Otherwise, the battery charger can overheat and no longer operate properly.

Products sold in GB only: Your product is fitted with a BS 1363/A approved electric plug with internal fuse (ASTA approved to BS 1362).

If the plug is not suitable for your socket outlets, it should be cut off and an appropriate plug fitted in its place by an authorised customer service agent.

The replacement plug should have the same fuse rating as the original plug.

The severed plug must be disposed of to avoid a possible shock hazard and should never be inserted into a mains socket elsewhere.

Symbols

The following symbols are important for reading and understanding the operating instructions. Please take note of the symbols and their meaning. The correct interpretation of the symbols will help you to use the garden product in a better and safer manner.

Symbol	Meaning
	Wear protective gloves
	Movement direction
	Reaction direction
	Weight
	Switching On
	Switching Off
	Permitted action
	Prohibited action
	Audible noise
	Accessories/Spare Parts

Intended Use

The machine is intended for the cutting of grass and weeds under bushes, as well as on slopes and edges that can not be reached with the lawn mower.

Intended use is related to operation within 0 °C and 40 °C ambient temperature.

Noise/Vibration Information

Sound emission values determined according to EN 60335-2-91.

Typically the A-weighted noise levels of the product are:
Sound pressure level 74 dB(A); sound power level 91 dB(A).
Uncertainty K = 3 dB.

Wear hearing protection!

Vibration total values a_h (triax vector sum) and uncertainty K determined according to EN 60335-2-91:
 $a_h = 2 \text{ m/s}^2$, $K = 1 \text{ m/s}^2$.

Starting

For Your Safety

- ▶ **Warning: Switch off and remove battery from machine before adjusting or cleaning.**
- ▶ **The cutting line continues to rotate for a few seconds after the trimmer is switched off. Allow the motor/cutting line to stop rotating before switching “on” again.**
- ▶ **Do not rapidly switch off and on.**
- ▶ **Remove any grass from spool cover when changing line or spool.**
- ▶ **Only use Bosch approved cutting elements. Cutting performance will vary with different cutting elements.**

Battery Charging

- ▶ **Do not use other battery chargers.** The supplied battery charger is designed for the Lithium-Ion battery in your garden product.
- ▶ **Observe the mains voltage!** The voltage of the power supply must correspond with the data given on the name-plate of the battery charger. Battery chargers marked with 230 V can also be operated with 220 V.

The battery is equipped with temperature monitoring that allows charging only in the temperature range between 0 °C and 45 °C. In this manner, a high battery service life is achieved.

Note: The battery supplied is partially charged. To ensure full capacity of the battery, completely charge the battery in the battery charger before using your power tool for the first time.

The lithium-ion battery can be charged at any time without reducing its service life. Interrupting the charging procedure does not damage the battery.

The “Electronic Cell Protection (ECP)” protects the lithium-ion battery against deep discharging. When the battery is run down or discharged, the garden product is shut off by means of a protective circuit: The garden product no longer operates.

⚠ IMPORTANT Do not continue to press the On/Off switch after the garden product has been automatically switched off. The battery can be damaged.

Charging Procedure

The charging procedure starts as soon as the mains plug of the battery charger is plugged into the socket outlet and the battery is inserted into the charging compartment.

Due to the intelligent charging method, the charging condition of the battery is automatically detected and the battery is charged with the optimum charging current, depending on battery temperature and voltage.

This gives longer life to the battery and always leaves it fully charged when kept in the charger for storage.

Rapid-charging Procedure

**AL 3640 CV
Professional**

**AL 3620 CV
Professional**

The rapid-charging procedure is indicated by **flashing** of the **green charge control LED**.

Indication element of the battery: During the charging procedure, the three green LEDs light up one after the other and briefly go out. The battery is fully charged when the three green LEDs light up continuously. The three LEDs go out again approx. 5 minutes after the battery has been fully charged.

Note: The rapid-charging procedure is only possible when the battery temperature is within the allowable charging temperature range, see section "Technical Data".

Battery Charged

**AL 3640 CV
Professional**

**AL 3620 CV
Professional**

Continuous lighting of the **green charge control LED** signals that the battery is fully charged.

Additionally, a signal tone sounds for approx. 2 seconds, which acoustically indicates that the battery is fully charged. Afterwards, the battery can be removed for immediate use.

With no battery inserted, **continuous lighting** of the **green charge control LED** indicates that the mains plug is plugged into the socket and that the battery charger is ready for operation.

Battery Temperature below 0 °C or above 45 °C

**AL 3640 CV
Professional**

**AL 3620 CV
Professional**

Continuous lighting of the **red LED** indicates that the battery temperature is not within the rapid-charging temperature range of 0 °C – 45 °C. As soon as the allowable temperature range is reached, the battery charger automatically switches to rapid charging.

When the battery is not within the allowable temperature range, the red battery LED lights up when inserting the battery into the battery charger.

No charging procedure possible

**AL 3640 CV
Professional**

**AL 3620 CV
Professional**

If a different malfunction of the charging procedure is present, this will be indicated through **flashing** of the **red charge control LED**.

The charging procedure cannot be started and the battery cannot be charged (see section "Troubleshooting").

Charging Advice

With continuous or several repetitive charging cycles without interruption, the charger can warm up. This is not meaningful and does not indicate a technical defect of the battery charger.

A significantly reduced working period after charging indicates that the battery is used and must be replaced.

Observe the notes for disposal.

Battery Cooling (Active Air Cooling)

The fan control integrated in the battery charger controls the temperature of the inserted battery. When the battery temperature is above 30 °C, a fan cools down the battery to the optimal charging temperature. The switched-on fan produces a fan noise.

The battery temperature is within the optimal charging temperature range when the fan is not running. Another reason for a non working fan might be that it is defective. In this case, the charging time of the battery might be extended.

18 | English

Troubleshooting

Problem	Possible Cause	Corrective Action
Trimmer fails to operate	Battery discharged	Recharge battery; also see "Battery Charging"
	Battery too hot/cold	Allow to cool/warm
	Battery not correctly inserted	Ensure battery is fitted on second catch
	Battery disconnected accidentally	Ensure battery is correctly fixed. Wait 10 seconds. Restart
Trimmer runs intermittently	Internal wiring of machine damaged	Contact Service Agent
	On/Off switch defective	Contact Service Agent
Garden product labours	Grass too high	Cut in stages
Machine does not cut	Cutting line too short/broken off	Replace cutting line
Line can not be fed	Spool empty	Replace the spool
	Line inside the spool entangled	Inspect the spool, rewind if necessary
Line keeps breaking	Line inside the spool entangled	Inspect the spool, rewind if necessary
Tool suddenly stops working	Battery charging level is too low	Check charge level on battery Recharge battery

Transport

The contained lithium-ion batteries are subject to the Dangerous Goods Legislation requirements. The user can transport the batteries by road without further requirements.

When being transported by third parties (e.g.: air transport or forwarding agency), special requirements on packaging and labelling must be observed. For preparation of the item being shipped, consulting an expert for hazardous material is required.

Dispatch batteries only when the housing is undamaged. Tape or mask off open contacts and pack up the battery in such a manner that it cannot move around in the packaging. Please also observe possibly more detailed national regulations.

Disposal

Do not dispose of garden products, battery chargers and batteries/rechargeable batteries into household waste!

Only for EC countries:

According to the European law 2012/19/EU, electrical and electronic equipments that are no longer usable, and according to the European law 2006/66/EC, defective or used battery packs/batteries, must be collected separately and disposed of in an environmentally correct manner.

Batteries no longer suitable for use can be directly returned at:
